Summary

AI / ML Engineer shipping production AI systems across voice, vision, agentic workflows, fine-tuned models, and scalable cloud backends.

Experience

Founder — Gurmat Darbar Sept 2025 - Present

- Built a Sikh community event platform used by 1,500+ people, covering 150+ samagams with 200+ contributions.
- Created an AI poster-intelligence pipeline that extracts multilingual event fields and prepares listings for publication.

Freelance AI Engineer — Independent Client Work Jun 2026 - Aug 2026

- Built a dashboard and three Indian-dialect voice agents for OT readiness, care follow-ups, and appointment booking using Bolna, LiveKit, Cartesia, and Deepgram.
- Designed graph-based agent reasoning and an OCR workflow that analyzes insurance forms for a client serving Indian hospitals.

AI Research Intern — mPragati Lab, IIT Delhi Sept 2025 - Jan 2026

- Developed and trained 3D U-Net pipelines for deep-learning-based skull implant reconstruction.

Junior Applications Engineer — Coridors (Remote) Aug 2024 - Sept 2025

- Built a Snowflake-backed Streamlit ingestion platform with 30+ interactive screens and Snowpark workflows.
- Delivered the company website and managed Vercel and Cloudflare deployments.

Educator — YouTube (@Param3021) Jan 2023 - Present

- Delivered 70+ live Python and ML sessions, reaching 175K+ learners.

Education

IIT Madras — BS in Data Science and Applications GPA: 8.3 — Sept 2022 - Present

- Diplomas in Programming and Data Science; coursework in LLMs, Mathematical Foundations for GenAI, and Software Engineering.

Projects

Pocket Coder — Local Coding Assistant GitHub

A 1.2B parameter local coding assistant fine-tuned to run offline across CPUs and GPUs.

Tools: PyTorch, LoRA, SFT, Ollama, MCP

- Fine-tuned LFM 2.5 with LoRA and scaled SFT context from 4K to 16K.
- Integrated Ollama with Jupyter magic and a VS Code MCP server.

GRWM — Get README With Me Live

A production multi-agent system that researches repositories and writes personalized GitHub READMEs.

Tools: LangGraph, FastAPI, Next.js, GCP, SSE

- Orchestrated Detective, CTO, and Ghostwriter agents with LangGraph and real-time SSE.
- Reached 100+ unique users in 16 hours and deployed on GCP Cloud Run.

Hand Gesture LNN — Liquid Neural Network Research GitHub

A from-scratch LTC network for segmenting 32-dimensional motion time series.

Tools: PyTorch, LNN, LTC, Time Series

- Built custom LTC cells and reached 54.6% validation accuracy, outperforming the LSTM baseline by 9.6 points.

Quizzo V2 — Quiz Management System GitHub

A scalable quiz platform with asynchronous jobs, rate limiting, and automated certificates.

Tools: Flask, Vue.js, Redis, Celery, PostgreSQL

- Used Redis and Celery for distributed jobs, email workflows, and certificate generation.

Skills

Languages: Python, JavaScript, Java, C, SQL, Bash, HTML/CSS

ML / GenAI: PyTorch, TensorFlow, LangGraph, LangChain, U-Net, Transformers, Vertex AI

Systems & Infra: FastAPI, Redis, PostgreSQL, Snowflake, GCP, Cloud Run, Docker, Git

Co-Curricular & Achievements

- Official Codex Ambassador for New Delhi; hosted community events and two hackathons, including one with approximately 150 participants.
- PyDelhi organizing team member and volunteer across local Python meetups.
- Presented Real-Time DEM for Autonomous Space Exploration at GLEX 2025.
- Delivered a Python One-Liners talk and published ML notes with 120+ GitHub stars.
